Cut and Paste

Matching with scissors and glue

Large print · One task per page · Hands-on with real objects · No screen

INSIDE: 2 ACTIVITIES · LEARNER-ONLY PAGES

- **Match the Number**
- **Match the Sign**

For teenagers and young adults learning foundational skills · cedarfieldlearning.com

Cut and Paste

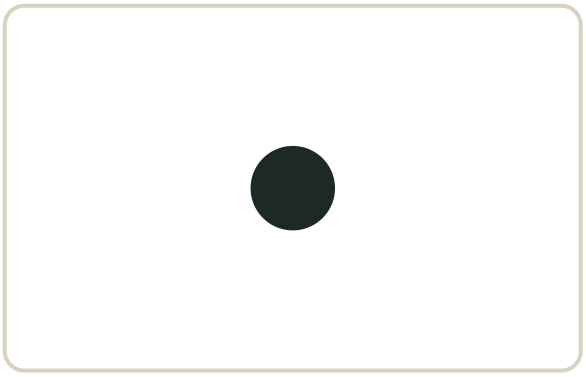

Two simple cut-and-paste activities. This time the learner pages show **only the task**, with no adult notes, for a calmer page. Everything you need is on this sheet.

Activity A · Match the Number (pages 2 and 3)
You need: safety scissors, a glue stick, 6 coins.
Say: "Count the dots. Find the number that matches. Cut it out and paste it in the box."
Hands-on: Your learner puts a coin on each dot and counts aloud, cuts out the number square along the thick dashed line, and pastes it in the box next to the dots.
Easier: You cut out the squares; your learner chooses and pastes.
Harder: Say the number before cutting.

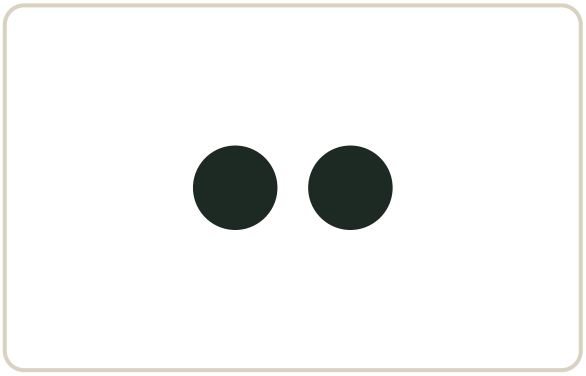

Activity B · Match the Sign (pages 4 and 5)
You need: safety scissors, a glue stick.
Say: "Here is STOP. Find the same word. Cut it out and paste it on top."
Hands-on: Your learner looks at each word, cuts out the matching card and pastes it on the same word, then says it with you: STOP, EXIT, OPEN.
Easier: Do one word per sitting. **Harder:** Read the word aloud before pasting.

Tip: cutting is a skill of its own. If scissors are hard today, tearing along the line or having you cut is completely fine. The matching is the main goal.

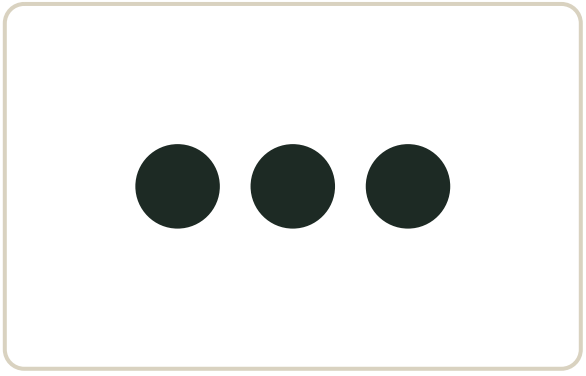

Match the Number
